

Samsung Galaxy S4 4.3 Software Update

C Spire Galaxy S 4 customers will begin receiving a system pop-up notifications for a new system update. To install, simply tap Install. The Galaxy S 4 will reboot and install the software update.

To manually check for the update on a C Spire Galaxy S 4, got to the Settings app, then select About device, and System updates. Click Check now to check for updates.

C Spire Galaxy S III customers can also download and install Samsung Kies (www.samsung.com/us/kies/) to update to the latest software. The Galaxy S III will need to be connected to the computer using a USB cable.
