

HTC Wildfire 2.2 Update Over-the-Air (OTA) Update Overview

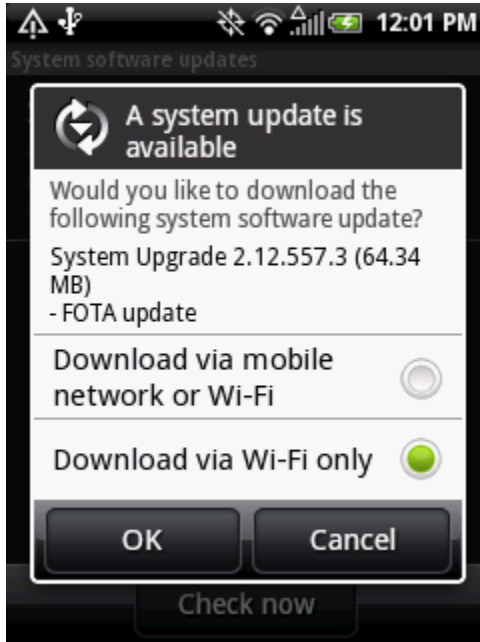

Your HTC Wildfire will soon receive a message notifying you that a system update is available.

This update includes the following items:

- Now you can save applications to your SD card instead of your phone's internal memory, greatly increasing the number of apps you can use
- Adobe Flash 10.x support
- Improvements to Google apps like Gmail and YouTube
- Speed enhancements – your Android phone will run faster
- Automatic backup of personal data when switching devices
- Enhanced Microsoft Exchange ActiveSync support
- Additional enhancements and fixes

NOTE: You will need 25MB of free space on your Wildfire before performing this system software update. To check the amount of free space you have, press Home > Menu > Settings > SD & phone storage. Make sure that Internal phone storage > Available space is more than 25.00 MB. If you do not have 25MB or more free you will need to delete applications installed on your phone by using the Android Market > My Apps or by going to Home > Menu > Settings > Applications > Manage applications. Press Menu > Sort by Size to see the largest apps and select the app you wish to uninstall and then select "Uninstall".

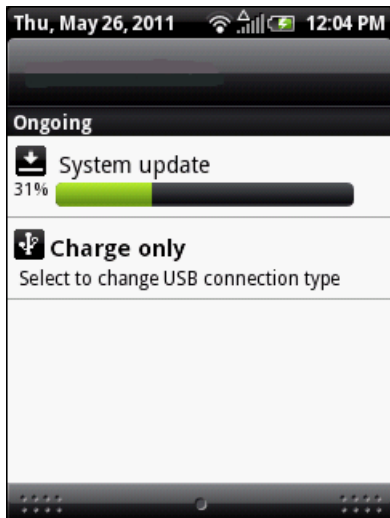

We recommend that customers connect the HTC Wildfire to a WiFi network for best results by selecting “Download via Wi-Fi only”. If no WiFi network is available, you can choose “Download via mobile network or Wi-Fi”.

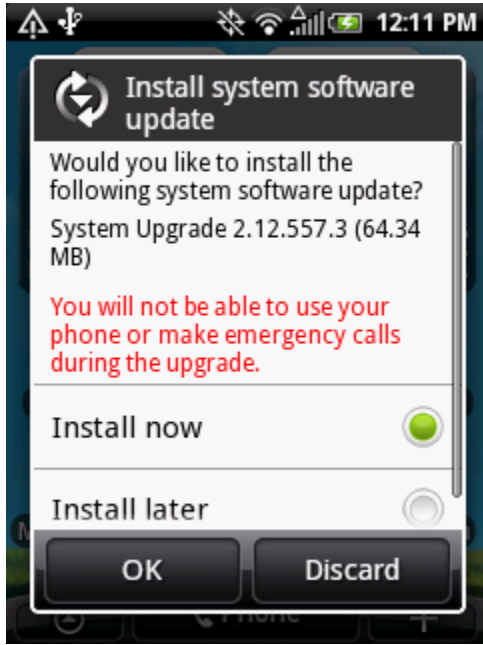

Once you have made your selection, press OK.

If you selected “Download via mobile network or Wi-Fi” a Data fee warning may appear notifying you of possible additional fees if you do not have an unlimited data plan. Press “Yes”.

The system update will begin to download. You can see the progress by viewing your notifications from your Home screen by pressing the Menu button and then “Notifications”.

Once the system update has finished downloading, you will see the following screen notifying you that the system software update is ready to be installed.

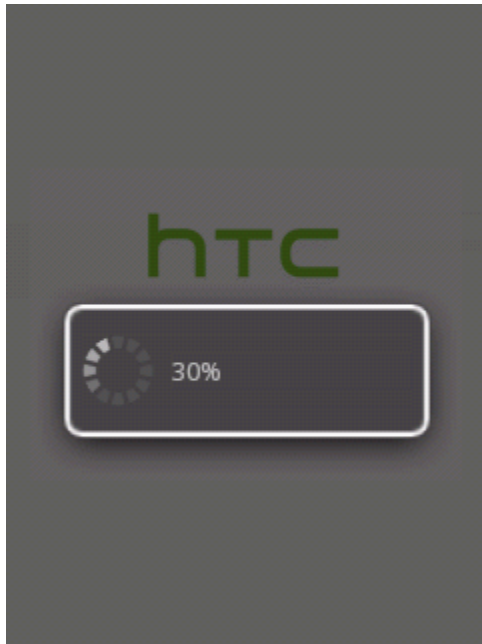

Note that you will not be able to use your phone or make emergency calls during the upgrade. Select "Install Now" or "Install Later" and press "OK".

If you selected "Install Now", the system software update will install and once complete, the screen will confirm that the update is complete.

Press "OK".

Your phone will restart apply additional updates.

After the phone restarts, the system software update is complete.
