What you'll find in this guide

HTC Wildfire uses the latest Android 2.2 (Froyo) platform which makes your mobile experience more exciting and engaging than ever.

Whether you bought a new phone already with Android 2.2 or you upgraded your phone platform, read this "What's new" guide to find out the great features you can now get out of your phone.

Contents

1. Find information where you want	3
2. Change your keyboard language on the fly	4
3. Type messages easier	5
4. See enhancements in apps	6
5. Lock your phone in more than one way	7
6. When setting up your phone	8

1. Find information where you want

Before, you could do a sweeping search on your phone or on the Web and get several results that you weren't exactly looking for. With **Google Search**, you can target your search to a particular app on your phone or to the entire Web. This will save you time and data connection charges.

Searching for information

1. From the Home screen, press the SEARCH button. The Google search box opens.

2. Tap . Then choose where you want to target your search.
3. Enter the information you want to search in the text box and then tap .
4. Tap a search result to open it in the related app.

For example, if you searched for a contact, tap the contact to open People.

5. If you couldn't find the information, tap the item to do a Web search.

The phone browser opens and lists results of your search.

Telling your phone where to search

1. From the Home screen, press MENU , and then tap **Settings > Search > Searchable items**.
2. Select the apps you want to include in the Google search options.
3. Press BACK.

2. Change your keyboard language on the fly

Because your HTC phone gives you global presence, you can change the onscreen keyboard layout to a number of languages you frequently use.

Before you can switch the onscreen keyboard layout to another language, you must first choose which languages you want to use.

1. From the Home screen, press MENU and tap **Settings** > **Language & keyboard**.
2. Tap **Touch Input** > **International keyboard**.
3. Choose the languages you want to switch the onscreen keyboard with.
4. Press BACK.
5. Open an app such as **Messages** to enter text.
6. To switch to a different keyboard language, tap the language switch key  and then choose another language.

3. Type messages easier

With a bigger text box, you can compose longer text messages (SMS) and fully express your thoughts.

1. From the Home screen, tap  > Messages.
2. Tap **New message**.
3. Fill in one or more message recipients.
4. Enter your text message, and then tap .

Your text message automatically becomes a multimedia message (MMS) when you include an attachment.

Adding an attachment to your multimedia message is made easier, with a slideout bar that lets you choose the type of file to include in your message.

4. See enhancements in apps

We've improved apps on the phone to better your experience.

Your phone's web browser

You can save or use as wallpaper any image you're viewing in the phone's browser.

1. From the Home screen, tap  > **Internet** and go to a website.
2. Press and hold an image. Then tap **Save image** or **Set as wallpaper** from the options menu.

People

Because a lot of your contacts are also present in social networking sites or have online albums, you can now link them to their social network accounts such as Facebook and Twitter. Make sure first that you have set up your social network accounts before you proceed.

1. From the Home screen tap  > **People**.
2. Tap a contact to open the contact details screen.
3. Tap  or  and then select the account you want to link the contact with.

You can then go to the **Updates and Events** tab () in People to view your contact's status updates, tweets, or changes to their online albums.

5. Lock your phone in more than one way

Your privacy is important to us. That's why we've given you more choices to lock your phone and prevent access to your most personal information.

1. From the Home screen, press MENU and tap **Settings > Security**.
2. Tap **Set up screen lock**.
3. Choose how you want to lock your phone:

Pattern	Follow the onscreen instructions to draw a screen unlock pattern.
PIN	Enter a PIN with at least 4 numbers.
Password	Enter a password containing at least a letter and numbers or symbols.

The next time you turn on your phone or wake up the screen, you must draw your unlock pattern or enter your PIN or password to unlock the screen.

Removing the pattern, PIN, or password lock

1. From the Home screen, press MENU and tap **Settings > Security**.
2. Tap **Change screen lock**.
3. Draw the correct screen unlock pattern, or enter your PIN or password.
4. Tap **None**.

6. When setting up your phone

You'll find that the paths to some settings on your phone have changed. See the table below for the new ways of accessing and changing these settings.

To	Do this on the Settings screen
Change sound settings, such as ringtone, notifications, and more	Tap Sound . Then choose the sound setting you want to change.
Change display settings, such as brightness, screen timeout, and more	Tap Display . Then choose the display setting you want to change.
Turn location services and GPS on or off	Tap Location . Then select or clear their check boxes.
Set up credential storage to manage Wi-Fi and VPN security certificates	Tap Security . Under the Credential storage section, tap Set password .
Reset your phone	Tap SD & phone storage > Factory data reset .
