

# Apple Watch

## your easy guide to parental controls

**What you'll need:** A good WiFi connection, your C Spire account username and password, your iPhone, and your kid's Apple Watch.

### 1. Set up your kid's Apple Watch

- Place your iPhone next to your kid's Watch
- Open your iPhone's Watch app and tap **"Set Up for a Family Member"**
- Scan the Apple Watch face with your iPhone camera
- Select their Watch preferences and passcode
- On your kid's Watch, enter the passcode

### 2. Create your kid's Apple ID

- Select **"Create New Apple ID"** or use your kid's existing one
- Enter your kid's info and tap **"Verify You're an Adult"**
- Tap to enter a new card or provide the CVV for your existing payment method
- Create an email address for their Apple ID or use an existing one

### 3. Activate your kid's Watch services

- Turn on **Ask to Buy** and **Share Location**
- Tap **"Set Up Cellular,"** enter your C Spire account info, and tap **"Activate a New Watch"**

Need help finding your username and password? Go to [cspire.com](https://cspire.com), tap **Sign In** and **"Forgot Username or Password,"** or **"Create an Account"** if you don't have one.

### 4. Modify your kid's Watch features

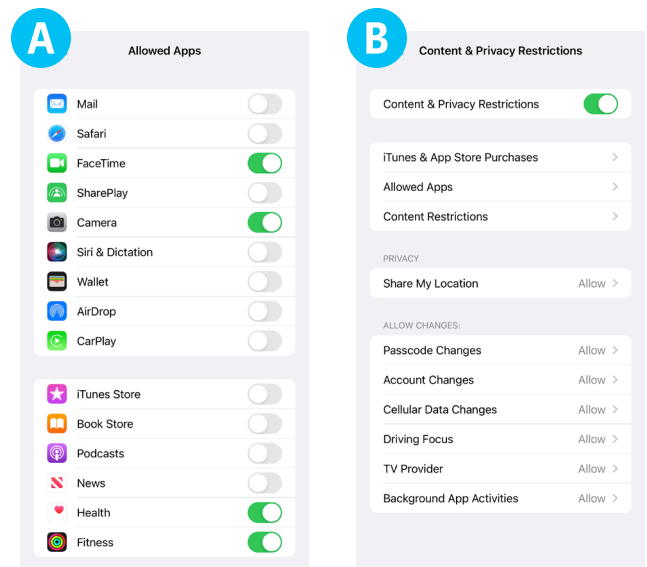

- Set up **location services, iMessage, health information, emergency contact** and other preferences

### 5. Set up Contacts and Screen Time

- Add important contacts and share with their Watch
- Enter a Screen Time passcode to manage parental controls
- Turn on **Schooltime** and enter their schedule
- Select their Watch app view

### 6. Adjust other Screen Time settings

- Go to the Watch app, select **Screen Time**, and tap **"Screen Time Settings"**
- Select **Content & Privacy Restrictions**, toggle them on, and enter your Screen Time password
- Tap **Allowed Apps** and set your restrictions to match our recommendations (see picture A)
- Tap **Back**, select **Content Restrictions**, and set your restrictions to match our recommendations (see picture B)

- Tap **Back** twice, select **Communication Safety**, and toggle on **"Check for Sensitive Photos"**
- Tap **Back**, select **Downtime**, toggle on **"Scheduled"** and **"Block at Downtime,"** and set your kid's screen downtime schedule
