

SECURITY AWARENESS TRAINING

As today's threat landscape evolves rapidly, it's increasingly vital that employees are armed and equipped with the right knowledge about modern social engineering attacks. By providing regular and relevant security awareness training, employees can become an effective component of the organization's risk mitigation strategy and become active participants in protecting the organization against threats.

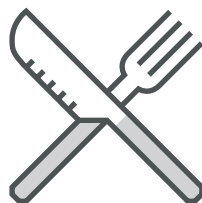

WHAT WE OFFER:

CLASSROOM TRAINING

Provides the maximum amount of instructor-learner interaction in a highly customized setting.

LUNCH AND LEARN

Maximize employee productivity by holding employee training over lunch.

ONLINE TRAINING

If your employee base is spread out geographically, employee training can be provided in the form of a live webinar.
