

Backup

Secure backup. Swift restoration. Smart business.

Data corruption, accidental deletions, hardware failure or natural disaster. Any one of these can cause your business to lose data. That's why backup and recovery may be the most critical linchpin in your cloud strategy.

Keep your business operations moving forward and avoid the potentially disastrous repercussions of lost data – make a solid plan for storing, archiving and backing up your data in the resilient cloud. And have a plan for the swift restoration and retrieval of that data. C Spire has your back.

Backup Fact:

North American Businesses Planning to Migrate Storage, Backup and Disaster Recovery Functions to the Cloud in 2015
