

## Mango Update Features

- **Linked Inboxes**  
**Stay organized by combining multiple email accounts into a single inbox.**
  - *Conversation View*—Manage your inbox better with consolidated email chains.
  - *Calendar*—Never miss an event with the new Facebook feature, which posts Facebook events in a color-coded calendar.
- **Internet Explorer Mobile**  
**Get a great web browsing experience on your phone.**
  - *Browse*—Enjoy improved hardware acceleration for faster web browsing.
  - *Share*—Post websites on Facebook directly from Internet Explorer Mobile.
  - *HTML 5*—Experience better animations and video with this industry standard.
- **Me Tile**  
**Brings together Facebook, Twitter, LinkedIn, and Windows Live Messenger—all in one place.**
  - *Update*—Post and receive social network updates all at once.
  - *Check-In*—Share your current location with friends.
  - *Chat Status*—Set your ‘online status’ for all your social networks with a single tap.
- **Multitasking**  
**Switch between apps and phone features—fast and easy.**
  - *Pause and Play*—Switch easily between games, apps, and other phone functions without losing your place.
- **Music + Videos**  
**A great music and video you’ll experience on a phone.**
  - *Personalized Playlists*—Customize playlists based on artist, album, or song.
  - *Smart DJ*—Compile auto-playlists based on criteria you choose.
- **Office Mobile**  
**Easy access to mobile versions of Word, Excel, and Powerpoint.**
  - *Sharepoint*—Pull down, edit, and save docs all from your Corporate Links in the Office Hub.
  - *Lync Client*— Coming Soon... Update your status, IM, and join conference calls from your appointment calendar with Lync server\*

- **Photos + Camera**

**Go from pocket-to-picture-to-post, quick and easy.**

- *Tagging*—Easily tag your friends in photos you post online, with built-in face-detection software.
- *Custom Settings*—Change and save custom camera settings.
- *Auto Fix*—Correct lighting, contrast, and clarity on photos with one-touch Auto Fix.

- **Search**

**Perform text, voice, visual, and audio searches all from Bing.**

- *Visual Search*—Capture information using your phone's camera to bring up online results on Bing.
- *Audio Search*—Find the title and artist for a song playing around you using audio search.

- **Voice to Text**

**Text, call, open apps, or search with your voice.**

- *Listen*—Hear your text messages read out loud, using a simple voice command.
- *Compose*—Create and reply to text messages by using your voice.
